

## Amendment according to PCT Article 34

4. Object of Amendment

Descriptions and Claims

- 5. Contents of Amendment
- (1) The inventors amend Example 1 to Test Example 5 in page 6 of descriptions, Test Example 5 to Test Example 6 in page 7 of descriptions and Example 2 to Example 1 in page 8 of descriptions.
- (2) The inventors amend "A transcriptional factor" in claims 1 to 3 to "A cancer treatment drug", delete claim 4 and add new claims 5 and 6.
- 6. List of Attached Documents
- (1) Descriptions: pages 6, 8, 9; total 3 pages
- (2) Claims: total 1 page

## Claims:

- 1. (amended) A cancer treatment drug comprising a transcriptional factor as an effective component, which comprises p53 or a mutated type p53, wherein one or more amino acids are deleted, substituted or added with respect to the amino sequence of p53, and clathrin heavy chains.
- 2. (amended) The cancer treatment drug of claim 1, wherein at least the serine residue at amino acid position 46 is substituted in said mutated type p53.
- 3. (amended) The cancer treatment drug of claim 2, wherein said serine residue at amino acid position 46 is substituted to phenylalanine.
- 4. (deleted)
- 5. (amended) A method for treating cancer comprising injecting a transcriptional factor, which comprises p53 or a mutated type p53, wherein one or more amino acids are deleted, substituted or added with respect to the amino sequence of p53, and clathrin heavy chains to a cancer cell, or injecting clathrin heavy chains to a cancer cell.
- 6. (new) The method for treating cancer of claim 5, wherein at least the serine residue at amino acid position 46 is substituted in said mutated type p53.
- 7. (new) The method for treating cancer of claim 6, wherein said serine residue at amino acid position 46 is substituted to phenylalanine.
